# IEP Manager. The smart way for teams to create and share Education Plans.

Empower class teachers, tutors, assistants and SENCOS to produce and share professional Individual and Group Education Plans and reviews – fast. With access to over 4000 newly written targets, suggestions for actions and success criteria, IEP Manager is the latest secure online web application from Blue Hills Software.

## Simplify.

Record multiple current memberships of Group Plans for individual pupils. All of a pupil's targets in his or her different Group Plans can be drawn together in one summary document. Monitor all the pupil memberships of Group Plans by year group.

## Share.

Make writing education plans a collaborative activity. Involve teachers, managers, pupils. Secure server logins offer remote access via the internet for all those with appropriate permissions. With no need to copy data onto memory sticks to share, confidential pupil information remains safe and secure. Links with SIMS, CMIS and other MIS for automatic scheduled data uploads of pupil and staff details.

## Motivate.

Support and motivate individual pupils by setting challenging targets, personal to their needs. Searchable target databases provide curriculum targets for English, Maths and ICT up to the end of Key Stage 3. Social, emotional and behaviour targets focus pupils and teachers on overcoming barriers to learning. EAL targets support new pupils in becoming part of the learning community. Gifted and talented targets ensure the most able pupils are challenged to fulfil their potential.

# Fully web based: secure access with ease

Securely hosted in England using **dedicated servers**, IEP Manager revolutionizes the way teams can review, work with and collaborate on Education Plan reports.

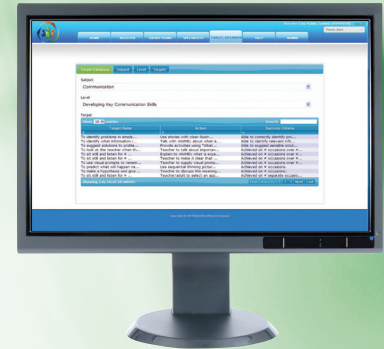

- Create useful documents ALL staff can benefit from.
- Share targets and strategies with read-only access.
- Set permissions for different user groups.
- No software to install, all updates made centrally.
- 8-8 telephone support from enhanced CRB checked Blue Hills staff.
- Daily backups.
